Zero Zone Introduces
The Edge™ XT Distributed Refrigeration System

NORTH PRAIRIE, WI – March 3, 2016—Zero Zone, Inc. is pleased to introduce the Edge™ XT Distributed System, an outdoor version of our well-known Edge™ Distributed System line.

Distributed refrigeration systems are used by small retail format stores that do not require a large refrigeration rack to cool the small number of refrigerated display cases and walk-ins in their facilities. Distributed systems are also very popular with larger supermarket chains, who prefer several smaller distributed systems rather than pumping all the refrigerant through one or two very large systems. The decreased refrigerant charge of smaller distributed systems minimizes environmental impact for the retailer.

Carl Petersen, Marketing & Advertising Manager for Zero Zone, noted, “Since its introduction in 2008, the indoor Edge™ Distributed System has been a go-to work horse for food retailers who wanted to have the convenience of a compact refrigeration system located in a back room of their stores. We now give them that same option, but for placement outdoors, either on the roof or on a concrete pad behind the store.”

Available with either scroll or reciprocating compressors, the Edge™ XT can be used to help optimize operating efficiency and conserve space within the store. Durable hinged doors allow for easy access and help protect the equipment. A weather-tight control panel and a sturdy galvanized exterior ensure that the Edge™ XT will deliver many years of reliable service.

The Edge™ XT also features integrated condenser coils, available in either micro-channel or ‘fin & tube’ varieties. Easy-access top-mount fans are available with single speed or variable speed ECM motors.

For more information about the entire Edge™ Distributed System line of products, visit us at zero-zone.com.

Established in 1961, Zero Zone is a leading manufacturer of refrigerated glass door display cases and commercial refrigeration systems for supermarkets, drug, dollar, and convenience stores. With display case plants in North Prairie and Waukesha, WI and refrigeration systems plants in Ramsey, MN, Zero Zone also manufactures industrial refrigeration systems for cold storage, food processing, and ice arenas.
