### Notes:

- For high-glide refrigerants, use dew point for unit sizing. Adjust evaporator pressure as needed to maintain discharge air temperatures.
- Evaporator temperatures listed above are for unlit shelves. Evaporator temperatures may need to be reduced for lit shelves or aftermarket display accessories.
- Baseline Evaporator Btu/h based on parallel rack system, 1 row LED canopy lighting (Zero Zone ChillBrite®), ECM or SSC electronic fan motors, 4 rows of angled and tiered shelves, and low sill height.
- For condensing units (non-rack system), multiply total Btu/h rating by 1.11 (R-404A) or 1.14 (R-448A).
- Discharge air temperature is measured at the outlet of the honeycomb.
- Discharge air velocity is average velocity at peak of defrost.

- Amps are based on electrical nameplate values. Watts are based on laboratory observations of actual energy use.
- Use 0.5 lb/ft evaporator refrigerant charge for receiver sizing.
- Glass windowed end panels only available with 2 1/2" end panels.

### Case Performance Notes:

- Btu/h load increases by approximately 120 Btu/h per foot for aftermarket shelving/merchandising.
- Operating temperature and defrost set points may need to be adjusted for alternate shelving, store conditions, or packout.
- A minimum 20° evaporator is recommended without positive defrost.

# Reveal Merchandiser® ORMC75(L/M)-MX Specs

Open Multi-Decks (75" Height)

ORMC75(L/M)-MX: (L=Low, M=Medium Sill Height)-MX=Meat Exclusive

Case Size	Length	Drain Dim.
4'	48"	24"
6'	72"	36"
8'	96"	48"
12'	144"	72"

Top refrigeration connections increase case height by up to 4".

\*Maximum depth for top shelf is 14" and 2<sup>nd</sup> shelf is 16".  
 \*\*If night curtain is ordered, 2<sup>nd</sup> row of canopy lights are not available.

SS-94-D

Specifications are subject to change without notice. All dimensions are nominal. Case designed to operate in an ambient temperature of 75°F and relative humidity of 55% or lower. Reveal Merchandiser® is a registered trademark of Zero Zone, Inc. in the United States.
